

AIR TECHNOLOGY LTD QUALITY MANAGEMENT POLICY STATEMENT

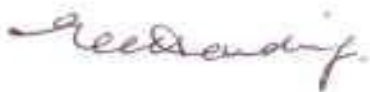

The Quality Policy Manual, together with the associated Operating Procedures, defines Air Technology's responsibilities and policy on quality matters. AIR TECHNOLOGY views their quality system as an integral part of the business and uses the results from it to generate continual improvement. The Manual defines the quality approach in all key managerial functions, replying in turn to each element of BS EN ISO 9001: 2000. By defining the management organisation for quality, describing the system structure and cross-referring to individual Operating Procedures, Process Instructions and Forms that affect quality, it is effectively a route map of the Company's quality system.

It is the policy of the Company to operate systems and procedures for quality management that meet at all times the requirements of BS EN ISO 9001: 2000. The objectives are to:-

1. Achieve customer satisfaction.
2. Respond promptly and effectively to the needs of our customers.
3. Ensure products are fit for purpose.
4. Ensure Operating Procedures are always appropriate to the current business climate and market demands.
5. Provide our staff with the working environment, resources and training to discharge their assigned duties most effectively.
6. Be among recognised within the industry as the leaders in quality in our chosen field.

It is the task of everyone in the Company to work to achieve the quality policy and objectives, through adherence to Operating Procedures, Process Instructions, Forms, Records and other agreed References.

By my signature I, Mr Eric Harding, Managing Director of Air Technology, confirm the commitment of the Company and its employees to the implementation of the Policy and System designed to comply with the requirements of BS EN ISO 9001 : 2000.
